WORK EXPERIENCES

STMicroelectronics | Embedded Software Engineer

Tunis | November 2021 – Present

Software design and development of the **STM32CubeProgrammer** tool(CLI/GUI) :

- **C/C++** development for **STM32CubeProgrammer** tool using **Qt framework**
- Adding new features for command-line interface (**CLI**)
- Developing of **C++** API exporting the features
- **GUI** development using **Java 8** and **JavaFx** on **IntelliJ IDEA**, adding new graphical features
- Using **Git** for version control and **Jenkins** for continuous integration
- Specification, design and development, intervention throughout the development cycle, analysis and bug fixing
- Software maintenance of communication protocols into the tool (**SWD, JTAG, UART, SPI, I2C & CAN**)
- Supporting the Secure Firmware Install (**SFI**)
- Supporting new **STM32** circuits based on the **ARM Cortex-M** architecture
- Developing **Python** and **Bash** scripts to automate unit and integration tests
- Developing the **GUI** part of **STM32 Trusted Package Creator** using **Qt/QML**
- Provide **customer support** and prepare patches
- Monitor and analyze **KPIs** to ensure customer satisfaction
- Cross-platform software (Linux, Windows 32-64 bit, MacOS)
- Writing of technical documents

Keywords : C, C++, Java, JavaFx, Python, Git, Qt creator, IntelliJ, Visual Studio, PyCharm, API, UML, STL, QML, Bugzilla platform, STM32, ARM, Cortex-M, MCU, MPU, XML, Agile, Scrum

STMicroelectronics | Mission in France

Grenoble | March 2023

- Contributed to the STM32CubeProgrammer project by supporting the first silicon of the STM32N6 circuit
- Successfully delivered a functional version of the tool

STMicroelectronics | Software development Internship

Tunis | March 2021 - September 2021

- Developing Script Manager platform for STM32CubeProgrammer tool using **C++** on **QtCreator** and **Java** on **IntelliJ IDEA**
- Developing a specific macros to allow users to automatically programming the STM32 memories (Flash, RAM, OTP)

NEW TUNIRAMA | Software development Internship

Tunis | September 2020

- Solving bugs and developing a new solution for internal platform using C++

Electro Diesel | Industrial Engineering Internship

Tunis | September 2018

- Repairing of electronic boards

DYTECH Tunisie | Internship

Tunis | June 2017

- Gaining working knowledge

SKILLS

Languages : C, C++, Assembly, Java, Python, C#, XML, Bash

Software skills: Qt, visual studio, IntelliJ, PyCharm, Keil IDE, IAR

Electronic boards: STM32, FPGA, Raspberry Pi, PIC, Arduino

Soft Skills : teamwork, communication, problem-solving

EDUCATION

National Engineering Diploma | 2018-2021

Specialty : Electronics and embedded systems
Faculty of Sciences of Tunis

Bachelor Degree | 2015-2018

Specialty : Electrical Engineering and Automation
Faculty of Sciences of Tunis

CERTIFICATIONS

C++ advanced

Id certificat : AdhLQftC2wG2if3tSYnAxYInvycm

Scrum Fundamentals Certified

Id certificat : 818121

Raspberry Pi : Using external devices

Id certificat : AWlIQnd0VDXNFuTQFVCaCWrydYwWH

Introduction to OpenCL on FPGAs

Id certificat : coursera.org/verify/4VNJLCQQ547D

PROJECTS

Smart Home : STM32F4, Arduino esp8266, Node MCU, Blynk, RFID, IoT, C, RTOS

Solar Tracker : Arduino, capteur LDR, LCD

Smart Reader : Raspberry Pi, camera, Python, Linux, tesseract, GTTS

LANGUAGES

ENGLISH : Professional

FRENCH : Professional

GERMAN : Elementary

ARABIC : Native
